What the Event Will Cover

- Best Practice in Dignity in Care
- The launch of the Respect for Dignity Kitemark

This regional dignity in care conference will provide delegates working within the health and social care sector with the opportunity to reflect on the national dignity in care campaign and make steps to improving the overall standard and experience of care which individuals receive.

The event will ultimately raise the continued importance of the campaign in promoting dignity and respect and the important role which individuals play in embedding this in everyday practice.

The conference will profile the launch of Leicester City and Leicestershire County Council's Respect for Dignity Kitemark.

Developed as a self-audit tool, the Kitemark will be awarded to care home providers who are actively seen to be delivering a service which promotes dignity in care and ensures that service users are treated in a dignified and respectful manner.

In addition to the launch of this Kitemark, the conference will also importantly address best practice in dignity in care related issues in the following workshops: MCA and DoLS, Medication, Nutrition, End of Life Care, Meaningful Activities and Person Centred Planning.
